

## eB1 Asset Discovery Manager

### HyperAgent™ Technology

- Single Agent technology
- Multi-level Monitoring and Reporting
- Real time one second data collection and reporting
- Web based and WAP enabled
- Highly Flexible
- Any Platform - Windows, Unix, Linux, AS/400 and OS/390
- Any Database - SQL Server, Oracle, Informix, DB2 and Sybase
- Highly Secure

### Product Overview

The eB1 Asset Discovery Manager is a powerful solution for discovering IT assets in any business environment. It provides full-featured asset tracking capabilities through automated discovery, hardware inventory, network inventory, software inventory, software usage monitoring, license management and extensive cross-platform reporting. By managing IT assets on various operating platforms, it provides a comprehensive assessment of your IT asset base. Using our HyperAgent™ technology, **this is all done without placing any software on the devices being tracked thus making this process totally invisible to the end user.**

### *Some of the data points collected:*

#### Computers

- IP Address
- Hostname
- Manufacturer
- Model
- Processor
  - Vendor
  - Name
  - Speed
  - Model
  - Core Count
- Memory
- Storage
  - Total
  - Used
- Operating System
  - Type
  - Version
  - Service Pack
  - Install Date
  - Registered Organization
  - Registered Owner
- Serial Number – if enabled by manufacturer
- Virus Definition Level - **NEW**

#### Software

- Package Name
- Install Date
- Date Last Used
- Serial Number – if enabled by manufacturer

#### Network Devices

- IP Address
- Name
- Description

#### Printers, Copiers, Scanners, Faxes

- IP Address
- Description
- Device Count
